Behavior Genetics, Vol. 26, No. 6, 1996

Subject Index for Volume 26

ACNGGN repeat sequence, 177
Adaptive abilities in rats, 186
Adolescence
Aggression
  in mice, 463, 477, 586, 588, 593
  intermale, in mice, 1
  neurobehavioral genetics, 459
Aggressive and nonaggressive male mice, 187, 588, 593
Aging
  in twins, 585
  in mice, 601
Agonistic behavior in mice, 463, 471
Alcohol action in mice, 447
Alcohol consumption
  in mice, 187, 563
  in humans, 601
Alcohol dehydrogenase, 189
Alcohol expectancies, 592
Alcohol preference in mice, 581, 598
Alcohol-related attitudes, 595
Alcoholism risk, 587
Animal models
  for Down syndrome in mice, 7
  for hyperactivity in mice, 7
Antisense oligodeoxynucleotides, 279
Anxiety in children, 584, 590, 599
Anxiolytics, 575
Assortative mating, 103, 582
Attention-deficit hyperactivity disorder (ADHD), 587, 594
Audiogenic seizures in mice, 188
Avoidance learning, 575
Avoidance rates, 575
Avoidance responses, 575

Behavior problems in twins, 419, 595, 596, 600
Body mass index, 598
Brain asymmetry, 373
Brain development in mammals, 279
Brain function and behavior in mammals, 279, 367

cAMP response element in hamsters, 221
Candidate genes, mice, 471, 586
Cardiovascular reactivity in twins, 594
Catecholamines, 477
Chlordiazepoxide, 575
Cholesky models, 65
Chorion type and handedness, 407, 409
Circadian rhythm, 177, 221, 505
Coaggregation, smoking and alcohol dependence, 591
Cognitive ability/intelligence
  in general, 135, 583, 585, 587, 594, 597
  specific, 586
Color vision in humans, 195
Common environmental variance of intelligence, 135
Comorbidity, alcohol dependence and depression, 582, 584
  mathematics and reading deficit, 589
  stimulant abuse and depression, 599
Conduct disorder and alcohol dependence, 598
Congenic strains, mice, 1
Coping styles, 582
Corpus callosum in mice, 185
Correlated response to selection, in mice, 189
Corticoid axis, 373
Crossbreeding, 477

Defect in DNA repair system, 188
Delta paths, 73
Depression, late-life, 591
Dermatoglyphics, 55
Differential heritability, 419
Differential treatment of twins, 535, 583
Direction of paw usage, 391
Dopamine receptors in humans, 325, 600
Dopaminergic response to cocaine, in mice, 186
Down syndrome in mice, 7
Drosophila
  egg laying, 39
  mating behavior, 15, 27
  melanogaster, 39, 49, 189
  paulistorum, 15, 27
  period gene, 177
  remating, 39
  reproductive isolation, 15, 27
  sexual isolation, 15, 27
  sperm competition, 39
Drug use, 586

Educational attainment, 89
EEG coherence, 600
Egg laying, *Drosophila*, 39
Elementary cognitive tasks, 135
Embryo transfer in mice, 513

0001-8244/96/1100-0613$09.50/0 © 1996 Plenum Publishing Corporation

Episodic memory, 555
Error-rate correction, 592
Estradiol sensitivity in mice, 189
Ethanol consumption: alcohol consumption
Externalizing behavior, 419

Factor analysis, 519
Factor rotation, 519
Familial transmission, humans, 592, 602
Family rearing environment, 583

GABAergic systems, 313, 497
Gene–environment interaction, 581
Genetic correlation, 477
Genetic markers in humans, 555, 594, 596
Genotypic factor scores, 161
Gonadotropin-releasing hormone, 241

Haloperidol response in mice, 588
Handedness
  in mice, 391
  in humans, 407
Hemispheric asymmetries, mice, 167, 379
Heterosis, mice, 439
Hippocampus, mice, 1, 167, 187, 379
Homogeneous set, mice, 463
Hyperactivity, 587

IBD calculation, 527
Immune reactivity, 373
Infant twins, 535
Intermale aggression, mice, 497
Internalizing behavior, 419
Interval mapping, 595
Isolation-induced aggression in mice, 188
Item response theory analysis, 601

Language ability, 588
Language delays, 596
Laterality, genetics of, 365, 391, 409
Learning styles, 581
Life events, 543, 590
Linkage analysis in humans, 113, 161, 592
Locomotor activity in mice, 505
Locus heterogeneity in humans, 113
Log-term potentiation and depression, 293
LS and SS, 447

Mammalian brain and behavior, 193
Mammalian olfaction, 209
Marijuana abuse and depression, 590
Mate selection, 73, 103
Maternal aggression in mice, 477
Maternal effects in mice, 513
Maternal environment in mice, 489
Mathematics disability, 581
Mating behavior in *Drosophila*, 15, 27

paw preference, 187, 373, 379, 391
pharmacogenetics, 447
predatory aggression, 477
protein kinase C, 301
QTL mapping, 149, 313, 505, 581, 584, 588, 595, 598
quinky gene, 190
recombinant inbred strains, 149
selection for aggression, 189, 588
selection responses, 439
selective breeding, 167, 477, 581, 588
sex hormone replacement, 186
sexual behavior, 477
social behavior, 463
standard tester, 463
stress response, 373
taste, inheritance of, 563, 589
testosterone, 477, 489, 497
transcriptional factors, 301
ultrasounds, 592
vocalizations, 427, 592
wild house mice, 489, 513
Y chromosome, 1, 471, 477, 489, 513
Mouse strains
NZB/BINJ, 1, 427
CBA/H, 1
C57BL/6, 149
C57BL/6J, 187
DBA/2, 149
BXD, 149
Multiple regression, 419
Multipoint linkage, 519, 527
Multivariate behavior genetic analysis, 65, 161, 519, 582
Mus domesticus, 439

Nest-building behavior in mice, 439
Neuronal acetylcholine receptor subunit α, humans, 190
Neurosteroids, 367
Neurotic symptoms and alcohol problems, 602
Neurotransmitters, 241
Newborn mice, 427
Null mutants, 301

Odortypes, 602
Offense in mice, 471
Olfaction in mice, 477, 497
Olfactory-specific proteins, 209
Open-field activity, 167
Opponent effect in mice, 497

Paw preference in mice, 187, 373, 379, 391
Pedigrees, human, 325
Personality, 543, 583, 586, 589, 596
and intelligence, 587
and social support, 597
Pharmacogenetics, 447
Phenocopies, humans, 113
Phenotypic assortment, 73
Predatory aggression in mice, 477
Prodynorphin gene in humans, 189
Protein kinase C, mice, 301
Psychopathology, 325
Psychopharmacology, 325

QTL mapping
humans, 161, 519, 527, 591, 601
mice, 149, 313, 447, 505, 581, 595
rats, 186
quinky gene in mice, 190

Rats
ACNGGN repeat sequence, 177
anxiolytics, 575
avoidance learning, 575
avoidance rates, 575
avoidance responses, 575
chlordiazepoxide, 575
circadian rhythm, 177
fawn-hooded, 593
QTL mapping, 186
reasoning test performance, 188

RFLPs, 177
Spalax ehrenbergi, 177
stress response, 186
subterranean mole rats, 177
Syracuse, 575
Reading disorder, 585, 589
Reasoning test performance, 188
Recombinant inbred strains
mice, 149
cereals, 599
Relative body weight, 103
Religious involvement, 595
Remating in *Drosophila*, 39
Reproduction, human, 590
Reproductive behaviors in mammals, 241, 279
Reproductive isolation in *Drosophila*, 15, 27
RFLPs, 177

Schizophrenia, 325
Schizotypy, 591
Secular changes, 89
Selection for aggression in mice, 189, 588
Selection responses in mice, 439
Selective breeding in mice, 167, 477, 581
Separation anxiety and alcoholism risk, 597
Sex differences
humans, 89, 587, 589
mice, 584
Sex hormone replacement in mice, 186
Sexual behavior in mice, 477
Sexual isolation in *Drosophila*, 15, 27
Short stature, hyperphagic, 585
Sibling interaction, 589
Sib-pair method, 519, 527
Simplex, 65
Simulations, statistical power, 113
Size polymorphism in fish, 597
Social attitudes, 123
Social behavior in mice, 463
Social contact, 123
Social homogamy, 73
Socialization scale, 599
Somatization, 598
Sperm competition in *Drosophila*, 39
Sports participation, 589
Standard tester for mice, 463
Steroid hormones, 367, 497
Stress response, 186, 373, 594
Structural models, 519, 593
Stuttering, classifying, 584
Subterranean mole, 177
Suprachiasmatic nucleus in hamsters, 221

Taste, inheritance of, 563, 589
Temperament, 535
Testosterone in mice, 477, 489, 497
Tolerance to ethanol in mice, 188
Transcription factors in learning and memory, 293
Transcriptional factors in mice, 301
Triangular decomposition, 65
Twin-family study, 543
Twin similarity, 55, 123
Twin studies
adolescence, 543
aging, 585
alcohol expectancies, 592
alcohol-related attitudes, 595
alcoholism risk, 587
anxiety, 599
behavior problems, 419, 595, 596, 600
body mass index, 598
cardiovascular reactivity, 594
